ISO 9001:2015 Quality Management, ISO 27001:2022 Information Security

## Industry Expertise

Banking, Healthcare, E-commerce, Retail

## Technology Stack

AI/ML, Computer Vision, DevSecOps, Cloud, IoT

# Digital Product Engineering Services

## Product Inception

Product Concept &  
Innovation, Architecture  
Design, Proof of Concept  
Development

## Product Support

Product Sustenance,  
Complete Product Ownership,  
Continuous Optimization

## Product Execution

Agile Development, DevOps  
Implementation, Independent  
Testing & Quality Assurance

## Product Transformation

Feature Enhancements,  
Technology Refresh,  
Cloud/SaaS Migration,  
Advanced Analytics

## Product Customization

Tailored Solutions,  
Professional Services,  
Custom Integrations

# Digital Consulting Excellence

## Envisioning & Planning

Transformation Workshops to align business goals with digital strategy and innovation roadmaps

## Strategic Advisory

Comprehensive roadmap services to guide your digital transformation journey with expert insights

## Implementation & Integration

Seamless integration services connecting systems, platforms, and technologies for optimal performance

## Solution Management

End-to-end solution management ensuring sustained value and continuous improvement

We leverage **Agile, SAFe, and Hybrid methodologies** to deliver consulting excellence tailored to your organizational needs.

# Technology Capabilities

## Cloud Solutions

AWS, Azure, Google Cloud infrastructure and migration services

## AI/ML & Computer Vision

Intelligent automation, predictive analytics, and visual recognition systems

## DevSecOps

Secure development pipelines, CI/CD automation, infrastructure as code

## IoT Integration

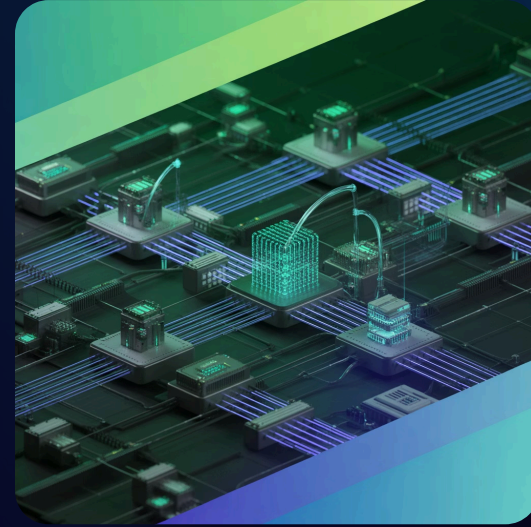

Connected device platforms, sensor networks, real-time data processing

## Mobile Solutions

Native and cross-platform mobile applications for iOS and Android

## Custom Software

Tailored enterprise applications and digital solutions

# Digital Marketing Services

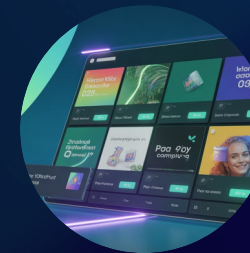

## SEO & Content Strategy

Drive organic traffic with strategic SEO optimization, keyword research, and compelling content creation that ranks

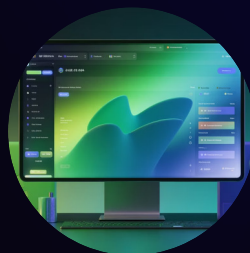

## Social Media Marketing

Build brand presence across platforms with targeted campaigns, community management, and influencer partnerships

## PPC & Paid Advertising

Maximize ROI with data-driven Google Ads, social media advertising, and conversion-optimized campaigns

Seamless integration with **Mastercard, VISA, RuPay, NPCI, Razorpay, Paytm**, major credit bureaus, and regulatory compliance bodies.

# 24/7

### Real-Time Processing

Continuous transaction monitoring and instant payment processing

# 99.9%

### System Uptime

Enterprise-grade reliability and availability

# AI

### Fraud Detection

Advanced machine learning for security and risk management

# Healthcare Domain Expertise

## Transforming Healthcare Delivery

Dedicated to revolutionizing the patient journey through innovative technology solutions that improve outcomes, enhance accessibility, and streamline operations.

### Custom Development

Tailored healthcare software solutions designed for hospitals, clinics, and healthcare providers

### EHR Integration

Electronic Health Records integration for seamless data exchange and interoperability

### Telemedicine

Remote healthcare platforms enabling virtual consultations and patient monitoring

### AI Diagnostics

Machine learning-driven diagnostics and patient care optimization systems

### Analytics & Reporting

Comprehensive healthcare data analytics and regulatory compliance reporting

### HIPAA Compliance

Security solutions meeting HIPAA standards and protecting patient privacy

# E-commerce Domain Expertise

## Enhanced Shopping Experiences

Delivering exceptional customer experiences through custom e-commerce platforms powered by AI-driven insights and seamless integrations.

---

## Custom Platform Development

Scalable e-commerce solutions tailored to your business model

---

## Mobile Commerce (m-commerce)

Native and responsive mobile shopping applications

---

## AI Personalization

Intelligent product recommendations and personalized shopping experiences

---

## Payment Integration

Secure payment gateway integration and checkout optimization

---

## Performance Analytics

Comprehensive tracking and insights for data-driven decisions

# Retail Domain Expertise

## Digitizing Retail Operations

Empowering retailers with intelligent automation and management systems that create hassle-free buying experiences and drive operational efficiency.

1

### Retail Software Solutions

Custom retail management platforms for inventory, sales, and customer relationship management

2

### Inventory Automation

Real-time inventory tracking, automated reordering, and warehouse management systems

3

### POS Integration

Advanced Point of Sale systems with seamless payment processing and reporting capabilities

4

### Customer Analytics

Deep insights into sales patterns, customer behavior, and purchasing trends to optimize business strategy

# AI-Enabled Warehouse Counting System

## Intelligent Package Recognition

Revolutionary AI-powered system that identifies correctly labeled company packages with precision, reducing manual errors and improving warehouse efficiency.

### Key Features

- **Built-in QR Code Scanning:** Instant verification of package metadata and tracking information
- **Customizable Recognition:** Adaptable to detect malpractice situations and anomalies
- **Evidence Storage:** Automatic archiving of count records and malpractice incidents as image artifacts
- **Third-Party Integration:** On-demand API connectivity with existing warehouse management systems
- **Real-Time Alerts:** Instant notifications for discrepancies and compliance issues

# Timely QR Food Ordering System

## Revolutionizing Restaurant Operations

Empowering restaurant owners to receive food orders seamlessly via QR code on WhatsApp, enabling efficient service without the need for dedicated mobile applications.

### Dine-In QR Menu

Customers scan QR codes to access digital menus instantly without downloading apps

### Owner Dashboard

Flexible control center with real-time order management and analytics

### Paperless Billing

Eco-friendly digital billing system with automated invoice generation

### Order Updates

Real-time WhatsApp notifications keeping customers informed throughout their dining experience

### System Integration

On-demand connectivity with POS systems and third-party restaurant management platforms

# Our Valued Clients

Trusted by Leading Organizations Worldwide

## Johnson & Johnson

Protocol Management System, USA -  
HIPAA Compliant Healthcare  
Solutions
